GPS Education Partners and students across Wisconsin need your help to continue providing manufacturers with the talent they need to help close the skills gap. This year we celebrate 20 years of serving leaders in both business and schools with programs to identify, build, and develop the future workforce with students who struggle to see the connection between their education and an attainable career. 94% of our students graduate, 84% plan to pursue a technical career. **TOGETHER WE ARE CLOSING THE GAP!**

By sponsoring a student, you are funding access and equity for a growing population of students who, without our help will not be able to successfully transition to the future workforce and realize their full-potential.
